Thin Solid Films 336 (1998) 393–401

thin solid films

Subject Index of Volume 336

Adlayers
Annealing of CaF_2 adlayers grown on Si(111): investigations of the morphology by atomic force microscopy, 120
Adsorption
Adsorption induced giant faceting of vicinal Si(001), 16
Al/Al_2O_3 multilayers
RF-sputtering deposition of Al/Al_2O_3 multilayers, 373
Allotaxy
Allotaxy in the Ni–Si system, 222
αAl_2O_3
Epitaxial growth of $LiNbO_3$ on $\alpha Al_2O_3(0001)$, 163
Aluminum
Orientation of aluminum nuclei on Si(100) and Si(111), 84
Antiferromagnet
Growth and magnetism of Co/NiO(111) thin films, 160
As–P exchange
Photoluminescence studies of As–P exchange in $GaAs/GaInP_2$ quantum wells grown by chemical beam epitaxy, 358
Atomic force microscope
Coalescence of germanium islands on silicon, 109
Annealing of CaF_2 adlayers grown on Si(111): investigations of the morphology by atomic force microscopy, 120
Cluster-size distribution of SiGe alloys grown by MBE, 53
Correlation between the sign of strain and the surface morphology and defect structure of InA1As grown on vicinal (111)BInP, 218
Early stages of growth and nanostructure of $Pb(Zr,Ti)O_3$ thin films observed by atomic force microscopy, 281
Lateral ordering of self-assembled Ge islands, 252
The influence of stress on growth instabilities on Si substrates, 124
TEM and AFM study of perovskite conductive $LaNiO_3$ films prepared by metalorganic decomposition, 386
Boron activation energy
Hole mobilities in pseudomorphic $Si_{1-x-y}Ge_xC_y$ alloy layers, 336
Boron diffusion
Retarded diffusion of boron in Si due to the formation of an epitaxial $CoSi_2$ layer, 26
BST thin film
Fabrication and electrical properties of sol-gel derived (BaSr)-TiO_3 thin films with metallic $LaNiO_3$ electrode, 172
Cadmium
Diffusion of Cd, Mg and S in ZnSe-based quantum well structures, 208
CaF_2
Annealing of CaF_2 adlayers grown on Si(111): investigations of the morphology by atomic force microscopy, 120
Capacitance spectroscopy
Formation of zero-dimensional hole states in Ge/Si heterostructures probed with capacitance spectroscopy, 332
Cathodoluminescence
Formation of highly uniform InGaAs ridge quantum wires by selective molecular beam epitaxy on novel InP patterned substrates, 22
CdS
Epitaxial growth of ZnS on CdS in CdS/ZnS nanostructures, 213
CdSe/ZnSe heterostructure
TEM studies of self-organization phenomena in CdSe fractional monolayers in a ZnSe matrix, 76
CdSe/ZnSe
Optical studies of carrier transport phenomena in CdSe/ZnSe fractional monolayer superlattices, 377
CdTe
Dynamical properties of trions and excitons in modulation doped CdTe/CdMgZnTe quantum wells, 286
CdZnTe
Valence band splitting in $Cd_{(1-x)}Zn_xTe$ epilayers, 205
Chemical beam epitaxy
Photoluminescence studies of As–P exchange in $GaAs/GaInP_2$ quantum wells grown by chemical beam epitaxy, 358
Chemical vapor deposition
Epitaxial growth at high rates with LEPECVD, 89
Influence of grown-in defects on the optical and electrical properties of $Si/Si_{1-x}Ge_x/Si$ heterostructures, 227
Optical and electrical characterization of SiGe layers for vertical sub-100 nm MOS transistors, 323
Orientation of aluminum nuclei on Si(100) and Si(111), 84
Photoluminescence of self-assembled Ge dots grown by ultra-high-vacuum chemical vapor deposition, 240
Morphology and photoluminescence of Ge islands grown on Si(001), 244
Cluster-size distribution
Cluster-size distribution of SiGe alloys grown by MBE, 53
Complementary metal oxide semiconductor
Silicon quantum integrated circuits – an attempt to fabricate silicon-based quantum devices using CMOS fabrication techniques, 130
Core/shell
Epitaxial growth of ZnS on CdS in CdS/ZnS nanostructures, 213
CoSi
The growth of an intermediate CoSi phase during the formation of epitaxial $CoSi_2$ by solid phase reaction, 201
Critical thickness
Growth of Ge on H-terminated Si(111) surface, 34

0040-6090/98/$ - see front matter © 1998 Elsevier Science S.A. All rights reserved.
PII S0040-6090(98)01640-X

Cross-hatch
STM study of step graded $Si_{1-x}Ge_x$/Si(001) buffers, 100
Cross-hatch pattern
Defect distribution and morphology development of SiGe layers grown on Si(100) substrates by LPE, 116
Crystallographic structure
Structural studies of epitaxial $PbTiO_3$ films by optical second harmonic generation, 291
C–V measurement
Tunnelling currents in very narrow p^+–n^+ junctions, 344
DC-electric field effects
Oscillatoric bias dependence of DC-electric field induced second harmonic generation from Si–SiO_2 multiple quantum wells, 350
Defects
Influence of grown-in defects on the optical and electrical properties of Si/$Si_{1-x}Ge_x$/Si heterostructures, 227
Optical and electrical characterization of SiGe layers for vertical sub-100 nm MOS transistors, 323
Diamagnetic shift
Magnetoluminescence measurements of two-dimensional hole gas, 366
Dielectric constant
Thin tantalum pentoxide films deposited by photo-induced CVD, 340
Diffusion
Diffusion of Cd, Mg and S in ZnSe-based quantum well structures, 208
Dimethyl aluminum hydride
Orientation of aluminum nuclei on Si(100) and Si(111), 84
Dislocation density
Crystal microstructure of PbTe/Si and PbTe/SiO_2/Si thin films, 196
Dislocations
Dislocation half loop formation in GaSb/(001)GaAs islands and steps role: a Monte Carlo simulation, 277
Structural characterization of SiGe step graded buffer layers grown on prestructured Si[001] substrates by molecular beam epitaxy, 92
Domain wall
Domain wall splitting and creation of the fine domain structure, 149
Doping
Surfactant-mediated epitaxy of Ge on Si: progress in growth and electrical characterization, 29
Doping superlattices
Retarded diffusion of boron in Si due to the formation of an epitaxial $CoSi_2$ layer, 26
2DHG
Influence of grown-in defects on the optical and electrical properties of Si/$Si_{1-x}Ge_x$/Si heterostructures, 227
Drain induced barrier lowering (DIBL)
The vertical heterojunction MOSFET, 299
Electrical transport
TEM study of InAs self-assembled quantum dots in GaAs, 38
Epitaxial growth
Low-energy electron microscopy of nanoscale three-dimensional SiGe islands on Si(100), 262
Epitaxial thin films
MgO surface microstructure and crystalline coherence of Co/Pt superlattices, 168
Structural studies of epitaxial $PbTiO_3$ films by optical second harmonic generation, 291
Epitaxial zirconia films
Epitaxial zirconia films on sapphire substrates, 156
Epitaxy
The influence of carbon on the surface morphology of Si(100) and on subsequent Ge island formation, 69
Etching pits
Crystal microstructure of PbTe/Si and PbTe/SiO_2/Si thin films, 196
Exchange coupling
Growth and magnetism of Co/NiO(111) thin films, 160
Excitons
Dynamical properties of trions and excitons in modulation doped CdTe/CdMgZnTe quantum wells, 286
Eximer lamp
Thin tantalum pentoxide films deposited by photo-induced CVD, 340
Faceting
Adsorption induced giant faceting of vicinal Si(001), 16
Faraday rotation
Two-dimensional and zero-dimensional structures of semimagnetic semiconductors prepared by pulsed laser deposition, 176
Ferroelectrics
Structural studies of epitaxial $PbTiO_3$ films by optical second harmonic generation, 291
Films
Dislocation pattern formation in epitaxial structures based on SiGe alloys, 112
Four-wave mixing
Dynamical properties of trions and excitons in modulation doped CdTe/CdMgZnTe quantum wells, 286
Fractional monolayer
Optical studies of carrier transport phenomena in CdSe/ZnSe fractional monolayer superlattices, 377
TEM studies of self-organization phenomena in CdSe fractional monolayers in a ZnSe matrix, 76
GaAs and GaP layers
Growth of III–V semiconductor layers on Si patterned substrates, 63
GaAs/$Ga_{0.86}In_{0.14}As$/GaAs
X-ray diffraction analysis of strain relaxation in free standing and buried GaAs/GaInAs/GaAs SQW lateral structures, 271
GaAs/$GaInP_2$ quantum wells
Photoluminescence studies of As–P exchange in GaAs/$GaInP_2$ quantum wells grown by chemical beam epitaxy, 358
GaSb/GaAs interface
Dislocation half loop formation in GaSb/(001)GaAs islands and steps role: a Monte Carlo simulation, 277
Ge
Surfactant-mediated epitaxy of Ge on Si: progress in growth and electrical characterization, 29
The influence of growth temperature on the period of RHEED oscillations during MBE of Si and Ge on Si(111) surface, 183
Ge-content
Optical on wafer measurement of Ge content of virtual SiGe-substrates, 347
Ge-film growths
Growth of Ge on H-terminated Si(111) surface, 34

Ge island
Lateral ordering of self-assembled Ge islands, 252
C-induced Ge dots: a versatile tool to fabricate ultra-small Ge nanostructures, 248
Morphology and photoluminescence of Ge islands grown on Si(001), 244
GeH_4
The growth kinetics of $Si_{1-x}Ge_x$ layers from SiH_4 and GeH_4, 191
Generation mechanisms
Dislocation pattern formation in epitaxial structures based on SiGe alloys, 112
Germanium
Carrier mobilities in modulation doped $Si_{1-x}Ge_x$ heterostructures with respect to FET applications, 141
Composition and structure of Ge islands grown on Si(001) and of SiGe grown on Si mesa, 73
Formation of zero-dimensional hole states in Ge/Si heterostructures probed with capacitance spectroscopy, 332
Role of hydrogen during Si capping of strained Ge or $Si_{1-x}Ge_x$ hut clusters, 49
Structural properties of Ge nano-crystals embedded in SiO_2 films from X-ray diffraction and Raman spectroscopy, 58
The influence of carbon on the surface morphology of Si(100) and on subsequent Ge island formation, 69
Germanium islands
Coalescence of germanium islands on silicon, 109
Graded silicon germanium buffers
STM study of step graded $Si_{1-x}Ge_x$/Si(001) buffers, 100
Grazing incidence diffraction
X-ray diffraction analysis of strain relaxation in free standing and buried GaAs/GaInAs/GaAs SQW lateral structures, , 271
Grazing incidence X-ray diffraction
The influence of stress on growth instabilities on Si substrates, 124
Growth
Growth of solution cast macromolecular π-conjugated nanoribbons on mica, 13
The influence of growth temperature on the period of RHEED oscillations during MBE of Si and Ge on Si(111) surface, 183
Growth kinetics
The growth kinetics of $Si_{1-x}Ge_x$ layers from SiH_4 and GeH_4, 191
Hall coefficient
Electrical properties of HgCdTe films obtained by laser deposition, 188
H-band, $Al_xGa_{1-x}As$/GaAs heterointerface
Magnetoluminescence measurements of two-dimensional hole gas, 366
Heat-pulse annealing
Low temperature epitaxial growth of Si on Si(111) by gas-source MBE with heat-pulse annealing, 232
Heteroepitaxy
Cluster-size distribution of SiGe alloys grown by MBE, 53
Dislocation half loop formation in GaSb/(001)GaAs islands and steps role: a Monte Carlo simulation, 277
Surfactant-mediated epitaxy of Ge on Si: progress in growth and electrical characterization, 29
Heterostructure field effect transistors
Silicon quantum integrated circuits – an attempt to fabricate silicon-based quantum devices using CMOS fabrication techniques, 130
Heterostructures
Influence of grown-in defects on the optical and electrical properties of Si/$Si_{1-x}Ge_x$/Si heterostructures, 227
Raman and photoreflectance studies of electronic band bending at ZnSe/GaAs interfaces, 381
HgCdTe films
Electrical properties of HgCdTe films obtained by laser deposition, 188
High deposition rate
Coalescence of germanium islands on silicon, 109
High resolution electron microscopy
Epitaxial growth of ZnS on CdS in CdS/ZnS nanostructures, 213
High-resolution X-ray diffraction
X-ray diffraction analysis of strain relaxation in free standing and buried GaAs/GaInAs/GaAs SQW lateral structures, , 271
Hut clusters
C-induced Ge dots: a versatile tool to fabricate ultra-small Ge nanostructures, 248
Hydrogen
Role of hydrogen during Si capping of strained Ge or $Si_{1-x}Ge_x$ hut clusters, 49
Hydrogen atom terminated Si
Growth of Ge on H-terminated Si(111) surface, 34II–VI nanostructures
Epitaxial growth of ZnS on CdS in CdS/ZnS nanostructures, 213
II–VI semiconductors
Diffusion of Cd, Mg and S in ZnSe-based quantum well structures, 208
InAlAs
Correlation between the sign of strain and the surface morphology and defect structure of InA1As grown on vicinal (111)BInP, 218
InAs quantum dots
Self-aggregation of InAs quantum dots on (*N*11) GaAs substrates, 9
InAs/GaAs
TEM study of InAs self-assembled quantum dots in GaAs, 38
Influence of external ohmic load
Tunnelling currents in very narrow p^+–n^+ junctions, 344
(In,Ga)As/GaAs layers
The determination of e_{14} in (111)B-grown (In,Ga)As/GaAs strained layers, 354
InGaAs ridge quantum wire
Formation of highly uniform InGaAs ridge quantum wires by selective molecular beam epitaxy on novel InP patterned substrates, 22
Ion assisted molecular beam epitaxy (IAMBE)
Ion assisted MBE growth of SiGe nanostructures, 104
Ion bombardment
Ion assisted MBE growth of SiGe nanostructures, 104
New virtual substrate concept for vertical MOS transistors, 319
Islands
Composition and structure of Ge islands grown on Si(001) and

of SiGe grown on Si mesa, 73
Kinetic roughening
Early stages of growth and nanostructure of $Pb(Zr,Ti)O_3$ thin films observed by atomic force microscopy, 281
$LaNiO_3$
Fabrication and electrical properties of sol-gel derived (BaSr)-TiO_3 thin films with metallic $LaNiO_3$ electrode, 172
$LaNiO_3$ film
TEM and AFM study of perovskite conductive $LaNiO_3$ films prepared by metalorganic decomposition, 386
Lead telluride
Crystal microstructure of PbTe/Si and $PbTe/SiO_2/Si$ thin films, 196
Limiting thickness
RHEED investigation of limiting thickness epitaxy during low-temperature Si-MBE on (100) surface, 179
$LiNbO_3$
Epitaxial growth of $LiNbO_3$ on $\alpha Al_2O_3(0001)$, 163
Liquid phase epitaxy
Defect distribution and morphology development of SiGe layers grown on Si(100) substrates by LPE, 116
Low energy electron microscopy
Adsorption induced giant faceting of vicinal Si(001), 16
Low energy ions
Relation of initial thin film formation to defects induced by low energy ions, 42
Low pressure chemical vapour deposition
Selectively grown vertical Si MOS transistor with reduced overlap capacitances, 306
Low temperature epitaxial growth
Low temperature epitaxial growth of Si on Si(111) by gas-source MBE with heat-pulse annealing, 232
Low-energy electron microscopy
Low-energy electron microscopy of nanoscale three-dimensional SiGe islands on Si(100), 262
Luminescence
Spectroscopic study of nanocrystalline TiO2 thin films grown by atomic layer deposition, 295
Magnesium
Diffusion of Cd, Mg and S in ZnSe-based quantum well structures, 208
Magnetic films and multilayers
MgO surface microstructure and crystalline coherence of Co/Pt superlattices, 168
Materials
Composition and structure of Ge islands grown on Si(001) and of SiGe grown on Si mesa, 73
MBE
RHEED investigation of limiting thickness epitaxy during low-temperature Si-MBE on (100) surface, 179
Mesa structures
Composition and structure of Ge islands grown on Si(001) and of SiGe grown on Si mesa, 73
Metal oxide semiconductor
The vertical heterojunction MOSFET, 299
Metal-organic decomposition
Fabrication and electrical properties of sol-gel derived (BaSr)-TiO_3 thin films with metallic $LaNiO_3$ electrode, 172
TEM and AFM study of perovskite conductive $LaNiO_3$ films prepared by metalorganic decomposition, 386
Metastable precursor clusters
Photoluminescence of self-assembled Ge dots grown by ultra-high-vacuum chemical vapor deposition, 240
Microstructure
Crystal microstructure of PbTe/Si and $PbTe/SiO_2/Si$ thin films, 196
C-induced Ge dots: a versatile tool to fabricate ultra-small Ge nanostructures, 248
Migration enhanced epitaxy
TEM studies of self-organization phenomena in CdSe fractional monolayers in a ZnSe matrix, 76
Miller capacitance
Selectively grown vertical Si MOS transistor with reduced overlap capacitances, 306
Minority diffusion constant
Assessment of transport parameters for the design of high speed Si/SiGe HBTs with compositionally graded base, 137
Misfit dislocations
Dislocation pattern formation in epitaxial structures based on SiGe alloys, 112
STM study of step graded $Si_{1-x}Ge_x$/Si(001) buffers, 100
Misorientation
Self organization of Ge dots on Si substrates: influence of misorientation, 256
Mobility
Carrier mobilities in modulation doped $Si_{1-x}Ge_x$ heterostructures with respect to FET applications, 141
Model
The growth kinetics of $Si_{1-x}Ge_x$ layers from SiH_4 and GeH_4, 191
Modeling
Dislocation half loop formation in GaSb/(001)GaAs islands and steps role: a Monte Carlo simulation, 277
Modulation doped quantum wells
Dynamical properties of trions and excitons in modulation doped CdTe/CdMgZnTe quantum wells, 286
Modulation-doped field effect transistors
Optimization of the channel doping profile of vertical sub-100 nm MOSFETs, 309
Molecular beam epitaxy
Coalescence of germanium islands on silicon, 109
Correlation between the sign of strain and the surface morphology and defect structure of InA1As grown on vicinal (111)BInP, 218
Lateral ordering of self-assembled Ge islands, 252
Optical and electrical characterization of SiGe layers for vertical sub-100 nm MOS transistors, 323
Optimization of the channel doping profile of vertical sub-100 nm MOSFETs, 309
Role of hydrogen during Si capping of strained Ge or $Si_{1-x}Ge_x$ hut clusters, 49
Strong surface segregation of Sb atoms at low temperatures during Si molecular beam epitaxy, 236
Surfactant-mediated epitaxy of Ge on Si: progress in growth and electrical characterization, 29
TEM investigation of the dependence of structural defects on prelayer formation in GaAs-on-Si thin films, 96
TEM studies of self-organization phenomena in CdSe fractional monolayers in a ZnSe matrix, 76
Molecular electronics
Growth of solution cast macromolecular π-conjugated nanoribbons on mica, 13

Molecular nanowire
Growth of solution cast macromolecular π-conjugated nanoribbons on mica, 13
Morphology
Defect distribution and morphology development of SiGe layers grown on Si(100) substrates by LPE, 116
TEM and AFM study of perovskite conductive $LaNiO_3$ films prepared by metalorganic decomposition, 386
MOS transistor
Selectively grown vertical Si MOS transistor with reduced overlap capacitances, 306
Multiple quantum wells
Oscillatoric bias dependence of DC-electric field induced second harmonic generation from Si–SiO_2 multiple quantum wells, 350
The determination of e_{14} in (111)B-grown (In,Ga)As/GaAs strained layers, 354
Multiple-angle ellipsometry
Characterization of inhomogeneous films by multiple-angle ellipsometry, 362
(*N*11) GaAs
Self-aggregation of InAs quantum dots on (*N*11) GaAs substrates, 9
Nanocrystal
Two-dimensional and zero-dimensional structures of semimagnetic semiconductors prepared by pulsed laser deposition, 176
Structural properties of Ge nano-crystals embedded in SiO_2 films from X-ray diffraction and Raman spectroscopy, 58
Nanostructrure
Spectroscopic study of nanocrystalline TiO2 thin films grown by atomic layer deposition, 295
Early stages of growth and nanostructure of $Pb(Zr,Ti)O_3$ thin films observed by atomic force microscopy, 281
Ni
Allotaxy in the Ni–Si system, 222
NiO
Growth and magnetism of Co/NiO(111) thin films, 160
Non-invasive charge detector
Simulation of a non-invasive charge detector for quantum cellular automata, 145
Numerical simulation
The growth kinetics of $Si_{1-x}Ge_x$ layers from SiH_4 and GeH_4, 191
Optical reflectivity
Optical on wafer measurement of Ge content of virtual SiGe-substrates, 347
Optoelectronic devices
TEM investigation of the dependence of structural defects on prelayer formation in GaAs-on-Si thin films, 96
Ordered terraces
Low temperature epitaxial growth of Si on Si(111) by gas-source MBE with heat-pulse annealing, 232
Oscillations
The influence of growth temperature on the period of RHEED oscillations during MBE of Si and Ge on Si(111) surface, 183
Oxidation
Retarded diffusion of boron in Si due to the formation of an epitaxial $CoSi_2$ layer, 26
Pattern geometry
Formation of highly uniform InGaAs ridge quantum wires by selective molecular beam epitaxy on novel InP patterned substrates, 22
Patterning
Structural characterization of SiGe step graded buffer layers grown on prestructured Si[001] substrates by molecular beam epitaxy, 92
Perovskites
Domain wall splitting and creation of the fine domain structure, 149
Photoconductivity
Electrical properties of HgCdTe films obtained by laser deposition, 188
Photocurrent
Optical and electrical characterization of SiGe layers for vertical sub-100 nm MOS transistors, 323
Photodissociation
Thin tantalum pentoxide films deposited by photo-induced CVD, 340
Photo-induced chemical vapour deposition
Thin tantalum pentoxide films deposited by photo-induced CVD, 340
Photoluminescence
Influence of grown-in defects on the optical and electrical properties of $Si/Si_{1-x}Ge_x/Si$ heterostructures, 227
Magnetoluminescence measurements of two-dimensional hole gas, 366
Morphology and photoluminescence of Ge islands grown on Si(001), 244
Optical and electrical characterization of SiGe layers for vertical sub-100 nm MOS transistors, 323
Photoluminescence of self-assembled Ge dots grown by ultra-high-vacuum chemical vapor deposition, 240
Photoluminescence studies of As–P exchange in $GaAs/GaInP_2$ quantum wells grown by chemical beam epitaxy, 358
Study of InAs quantum dots in GaAs prepared on misoriented substrates, 80
Photoluminescence excitation
Magnetoluminescence measurements of two-dimensional hole gas, 366
Photoreflectance
Raman and photoreflectance studies of electronic band bending at ZnSe/GaAs interfaces, 381
Piezoelectric thin films
Early stages of growth and nanostructure of $Pb(Zr,Ti)O_3$ thin films observed by atomic force microscopy, 281
Plasma enhanced chemical vapor deposition
Epitaxial growth at high rates with LEPECVD, 89
Point defects
Ion assisted MBE growth of SiGe nanostructures, 104
New virtual substrate concept for vertical MOS transistors, 319
Polarized PL
Valence band splitting in $Cd_{(1-x)}Zn_xTe$ epilayers, 205
Pseudomorphic SiGeC
Hole mobilities in pseudomorphic $Si_{1-x-y}Ge_xC_y$ alloy layers, 336
Pulse laser deposition
Electrical properties of HgCdTe films obtained by laser deposition, 188

Pulse vacuum thermal deposition
Growth of III–V semiconductor layers on Si patterned substrates, 63
Pulsed laser deposition
Early stages of growth and nanostructure of $Pb(Zr,Ti)O_3$ thin films observed by atomic force microscopy, 281
Epitaxial growth of $LiNbO_3$ on $\alpha Al_2O_3(0001)$, 163
Pulsed laser deposition of SmBaCuO thin films, 153
Two-dimensional and zero-dimensional structures of semimagnetic semiconductors prepared by pulsed laser deposition, 176
Quantum cellular automata
Simulation of a non-invasive charge detector for quantum cellular automata, 145
Quantum devices
Silicon quantum integrated circuits – an attempt to fabricate silicon-based quantum devices using CMOS fabrication techniques, 130
Quantum dots
C-induced Ge dots: a versatile tool to fabricate ultra-small Ge nanostructures, 248
Formation of zero-dimensional hole states in Ge/Si heterostructures probed with capacitance spectroscopy, 332
Shape, size, strain and correlations in quantum dot systems studied by grazing incidence X-ray scattering methods, 2
Study of InAs quantum dots in GaAs prepared on misoriented substrates, 80
Quantum wells
Optical pumping in strained $In_xGa_{1-x}As/GaAs$ quantum wells, 370
Raman spectroscopy
Raman and photoreflectance studies of electronic band bending at ZnSe/GaAs interfaces, 381
Structural properties of Ge nano-crystals embedded in SiO_2 films from X-ray diffraction and Raman spectroscopy, 58
Study of InAs quantum dots in GaAs prepared on misoriented substrates, 80
Reflection high-energy electron diffraction
Role of hydrogen during Si capping of strained Ge or $Si_{1-x}Ge_x$ hut clusters, 49
Refractive index
Characterization of inhomogeneous films by multiple-angle ellipsometry, 362
Relaxed buffer
Epitaxial growth at high rates with LEPECVD, 89
Relaxed layers
Defect distribution and morphology development of SiGe layers grown on Si(100) substrates by LPE, 116
Relaxed SiGe buffer layers
Ion assisted MBE growth of SiGe nanostructures, 104
RF-sputtering
RF-sputtering deposition of Al/Al_2O_3 multilayers, 373
Structural properties of Ge nano-crystals embedded in SiO_2 films from X-ray diffraction and Raman spectroscopy, 58
RHEED
RHEED investigation of limiting thickness epitaxy during low-temperature Si-MBE on (100) surface, 179
The influence of growth temperature on the period of RHEED oscillations during MBE of Si and Ge on Si(111) surface, 183
Sapphire substrates
Epitaxial zirconia films on sapphire substrates, 156
Sb
Surfactant-mediated epitaxy of Ge on Si: progress in growth and electrical characterization, 29
Scanning electron microscopy
Cluster-size distribution of SiGe alloys grown by MBE, 53
Formation of highly uniform InGaAs ridge quantum wires by selective molecular beam epitaxy on novel InP patterned substrates, 22
RF-sputtering deposition of Al/Al_2O_3 multilayers, 373
Scanning force microscopy
Growth of solution cast macromolecular π-conjugated nanoribbons on mica, 13
Scanning tunneling microscopy
Growth of Ge on H-terminated Si(111) surface, 34
STM study of step graded $Si_{1-x}Ge_x/Si(001)$ buffers, 100
The influence of carbon on the surface morphology of Si(100) and on subsequent Ge island formation, 69
Second harmonic generation
Oscillatoric bias dependence of DC-electric field induced second harmonic generation from $Si–SiO_2$ multiple quantum wells, 350
Structural studies of epitaxial $PbTiO_3$ films by optical second harmonic generation, 291
Segregation
Surfactant-mediated epitaxy of Ge on Si: progress in growth and electrical characterization, 29
Selective epitaxial growth
Selectively grown vertical Si MOS transistor with reduced overlap capacitances, 306
Selective molecule beam epitaxy
Formation of highly uniform InGaAs ridge quantum wires by selective molecular beam epitaxy on novel InP patterned substrates, 22
Self organization
Self organization of Ge dots on Si substrates: influence of misorientation, 256
Self-aggregation
Self-aggregation of InAs quantum dots on (*N*11) GaAs substrates, 9
Self-assembled growth
Shape, size, strain and correlations in quantum dot systems studied by grazing incidence X-ray scattering methods, 2
Self-assembled quantum dots
Photoluminescence of self-assembled Ge dots grown by ultra-high-vacuum chemical vapor deposition, 240
TEM study of InAs self-assembled quantum dots in GaAs, 38
Self-assembly
Growth of solution cast macromolecular π-conjugated nanoribbons on mica, 13
Self-ordering
Lateral ordering of self-assembled Ge islands, 252
Self-organizing growth
Morphology and photoluminescence of Ge islands grown on Si(001), 244
Semiconductor nanostructures
Shape, size, strain and correlations in quantum dot systems studied by grazing incidence X-ray scattering methods, 2
Semimagnetic semiconductor
Two-dimensional and zero-dimensional structures of semimagnetic semiconductors prepared by pulsed laser deposition, 176

Si
Allotaxy in the Ni–Si system, 222
Influence of grown-in defects on the optical and electrical properties of $Si/Si_{1-x}Ge_x/Si$ heterostructures, 227
Morphology and photoluminescence of Ge islands grown on Si(001), 244
The influence of growth temperature on the period of RHEED oscillations during MBE of Si and Ge on Si(111) surface, 183
Si(001)
Adsorption induced giant faceting of vicinal Si(001), 16
Si(100)
Low-energy electron microscopy of nanoscale three-dimensional SiGe islands on Si(100), 262
Orientation of aluminum nuclei on Si(100) and Si(111), 84
Si(111)
Annealing of CaF_2 adlayers grown on Si(111): investigations of the morphology by atomic force microscopy, 120
Growth of Ge on H-terminated Si(111) surface, 34
Orientation of aluminum nuclei on Si(100) and Si(111), 84
Surfactant-mediated epitaxy of Ge on Si: progress in growth and electrical characterization, 29
Si/SiGe heterojunction bipolar transistor
Assessment of transport parameters for the design of high speed Si/SiGe HBTs with compositionally graded base, 137
SiGe
Cluster-size distribution of SiGe alloys grown by MBE, 53
Defect distribution and morphology development of SiGe layers grown on Si(100) substrates by LPE, 116
Epitaxial growth at high rates with LEPECVD, 89
Optical on wafer measurement of Ge content of virtual SiGe-substrates, 347
Silicon quantum integrated circuits – an attempt to fabricate silicon-based quantum devices using CMOS fabrication techniques, 130
Surfactant-mediated epitaxy of Ge on Si: progress in growth and electrical characterization, 29
SiGe alloys
Dislocation pattern formation in epitaxial structures based on SiGe alloys, 112
SiGe step-graded buffer
Structural characterization of SiGe step graded buffer layers grown on prestructured Si[001] substrates by molecular beam epitaxy, 92
SiGe/Si Heterostructures
Optical and electrical characterization of SiGe layers for vertical sub-100 nm MOS transistors, 323
SiGeC
C-induced Ge dots: a versatile tool to fabricate ultra-small Ge nanostructures, 248
SiH_4
The growth kinetics of $Si_{1-x}Ge_x$ layers from SiH_4 and GeH_4, 191
Silicide
Retarded diffusion of boron in Si due to the formation of an epitaxial $CoSi_2$ layer, 26
Silicon
Carrier mobilities in modulation doped $Si_{1-x}Ge_x$ heterostructures with respect to FET applications, 141
Composition and structure of Ge islands grown on Si(001) and of SiGe grown on Si mesa, 73
Formation of zero-dimensional hole states in Ge/Si heterostructures probed with capacitance spectroscopy, 332
Retarded diffusion of boron in Si due to the formation of an epitaxial $CoSi_2$ layer, 26
RHEED investigation of limiting thickness epitaxy during low-temperature Si-MBE on (100) surface, 179
Role of hydrogen during Si capping of strained Ge or $Si_{1-x}Ge_x$ hut clusters, 49
The influence of carbon on the surface morphology of Si(100) and on subsequent Ge island formation, 69
Silicon compounds
Hole mobilities in pseudomorphic $Si_{1-x-y}Ge_xC_y$ alloy layers, 336
Si-MBE
Optical on wafer measurement of Ge content of virtual SiGe-substrates, 347
Si-MOSFETs
Comparison of lateral and vertical Si-MOSFETs with ultra short channels, 313
Single crystal epitaxy
Growth and magnetism of Co/NiO(111) thin films, 160
Single quantum well
X-ray diffraction analysis of strain relaxation in free standing and buried GaAs/GaInAs/GaAs SQW lateral structures, , 271
Si patterned substrates
Growth of III–V semiconductor layers on Si patterned substrates, 63
Si substrates
Self organization of Ge dots on Si substrates: influence of misorientation, 256
SmBaCuO
Pulsed laser deposition of SmBaCuO thin films, 153
Sol-gel processing
Fabrication and electrical properties of sol-gel derived (BaSr)-TiO_3 thin films with metallic $LaNiO_3$ electrode, 172
Solid phase reaction
The growth of an intermediate CoSi phase during the formation of epitaxial $CoSi_2$ by solid phase reaction, 201
Solid solutions
Domain wall splitting and creation of the fine domain structure, 149
Step bunching
Adsorption induced giant faceting of vicinal Si(001), 16
Lateral ordering of self-assembled Ge islands, 252
Steps
Dislocation half loop formation in GaSb/(001)GaAs islands and steps role: a Monte Carlo simulation, 277
Straight step edges
Low temperature epitaxial growth of Si on Si(111) by gas-source MBE with heat-pulse annealing, 232
Strain induced effects
Optical pumping in strained $In_xGa_{1-x}As/GaAs$ quantum wells, 370
Strains
Epitaxial growth of $LiNbO_3$ on $\alpha Al_2O_3(0001)$, 163
Structural properties
Spectroscopic study of nanocrystalline TiO2 thin films grown by atomic layer deposition, 295

TEM investigation of the dependence of structural defects on prelayer formation in GaAs-on-Si thin films, 96
Sulfur
Diffusion of Cd, Mg and S in ZnSe-based quantum well structures, 208
Superlattice
Optical studies of carrier transport phenomena in CdSe/ZnSe fractional monolayer superlattices, 377
Supramolecular architecture
Growth of solution cast macromolecular π-conjugated nanoribbons on mica, 13
Surface diffusion
Role of hydrogen during Si capping of strained Ge or $Si_{1-x}Ge_x$ hut clusters, 49
Surface morphology
Coalescence of germanium islands on silicon, 109
The influence of carbon on the surface morphology of Si(100) and on subsequent Ge island formation, 69
Surface segregation
Strong surface segregation of Sb atoms at low temperatures during Si molecular beam epitaxy, 236
Surfactant, Hall mobility, Capacitance–voltage
Surfactant-mediated epitaxy of Ge on Si: progress in growth and electrical characterization, 29
Ta_2O_5
Thin tantalum pentoxide films deposited by photo-induced CVD, 340
Tapping-mode atomic force microscopy
Low temperature epitaxial growth of Si on Si(111) by gas-source MBE with heat-pulse annealing, 232
Temperature behaviour of Esaki current
Tunnelling currents in very narrow p^+–n^+ junctions, 344
Thermally-detected optical absorption
The determination of e_{14} in (111)B-grown (In,Ga)As/GaAs strained layers, 354
Thin film
Thin tantalum pentoxide films deposited by photo-induced CVD, 340
Two-dimensional and zero-dimensional structures of semimagnetic semiconductors prepared by pulsed laser deposition, 176
Crystal microstructure of PbTe/Si and PbTe/SiO_2/Si thin films, 196
Pulsed laser deposition of SmBaCuO thin films, 153
Relation of initial thin film formation to defects induced by low energy ions, 42
Thin film growth
Epitaxial growth of $LiNbO_3$ on αAl_2O_3(0001), 163
Thin relaxed SiGe buffer layer
New virtual substrate concept for vertical MOS transistors, 319
Threading dislocations
Ion assisted MBE growth of SiGe nanostructures, 104
New virtual substrate concept for vertical MOS transistors, 319
Three-dimensional SiGe islands
Low-energy electron microscopy of nanoscale three-dimensional SiGe islands on Si(100), 262
Time-resolved photoluminescence
Dynamical properties of trions and excitons in modulation doped CdTe/CdMgZnTe quantum wells, 286
Titanium oxide
Spectroscopic study of nanocrystalline TiO2 thin films grown by atomic layer deposition, 295
Transmission electron microscopy
Epitaxial growth of $LiNbO_3$ on αAl_2O_3(0001), 163
Structural characterization of SiGe step graded buffer layers grown on prestructured Si[001] substrates by molecular beam epitaxy, 92
TEM and AFM study of perovskite conductive $LaNiO_3$ films prepared by metalorganic decomposition, 386
TEM investigation of the dependence of structural defects on prelayer formation in GaAs-on-Si thin films, 96
TEM studies of self-organization phenomena in CdSe fractional monolayers in a ZnSe matrix, 76
TEM study of InAs self-assembled quantum dots in GaAs, 38
The growth of an intermediate CoSi phase during the formation of epitaxial $CoSi_2$ by solid phase reaction, 201
The influence of stress on growth instabilities on Si substrates, 124
Allotaxy in the Ni–Si system, 222
Transparent films
Characterization of inhomogeneous films by multiple-angle ellipsometry, 362
Transport properties
Hole mobilities in pseudomorphic $Si_{1-x-y}Ge_xC_y$ alloy layers, 336
Optical studies of carrier transport phenomena in CdSe/ZnSe fractional monolayer superlattices, 377
Trions
Dynamical properties of trions and excitons in modulation doped CdTe/CdMgZnTe quantum wells, 286
Tunnelling
Tunnelling currents in very narrow p^+–n^+ junctions, 344
Ultra high vacuum scanning tunneling microscope
Relation of initial thin film formation to defects induced by low energy ions, 42
Ultra short channels
Comparison of lateral and vertical Si-MOSFETs with ultra short channels, 313
Undulations
Defect distribution and morphology development of SiGe layers grown on Si(100) substrates by LPE, 116
Uniformity
Formation of highly uniform InGaAs ridge quantum wires by selective molecular beam epitaxy on novel InP patterned substrates, 22
Valence band splitting
Valence band splitting in $Cd_{(1-x)}Zn_xTe$ epilayers, 205
Variation of temperature
Coalescence of germanium islands on silicon, 109
Vertical alignment
C-induced Ge dots: a versatile tool to fabricate ultra-small Ge nanostructures, 248
Very low temperature growth
New virtual substrate concept for vertical MOS transistors, 319
Vicinal surface
Lateral ordering of self-assembled Ge islands, 252
Virtual substrate
Ion assisted MBE growth of SiGe nanostructures, 104
New virtual substrate concept for vertical MOS transistors, 319
Optical on wafer measurement of Ge content of virtual SiGe-substrates, 347
X-ray

Correlation between the sign of strain and the surface morphology and defect structure of InA1As grown on vicinal (111)BInP, 218
X-ray analysis
Crystal microstructure of PbTe/Si and PbTe/SiO_2/Si thin films, 196
X-ray diffraction
Growth and magnetism of Co/NiO(111) thin films, 160
RF-sputtering deposition of Al/Al_2O_3 multilayers, 373
Structural properties of Ge nano-crystals embedded in SiO_2 films from X-ray diffraction and Raman spectroscopy, 58
X-ray reflectivity
Strong surface segregation of Sb atoms at low temperatures during Si molecular beam epitaxy, 236
X-ray scattering
Shape, size, strain and correlations in quantum dot systems studied by grazing incidence X-ray scattering methods, 2
ZnS
Epitaxial growth of ZnS on CdS in CdS/ZnS nanostructures, 213
ZnSe
Raman and photoreflectance studies of electronic band bending at ZnSe/GaAs interfaces, 381
